| Equipment ID #: Cleanroom Suite 114 (Anteroom & Buffer Room)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Active Air Sample and Surface Sampling |
| Sample ID #: N/A 21Aug26 SMO                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Sample/Material Lot #: N/A 21Aug26 SMO |
| NONCONFORMITY DESCRIPTION (Who, What, When, Where, Why, & How)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                        |
| <p><b>Nonconformance Description:</b></p> <p>It was identified that EM analyst SMO did not perform the routine required weekly surface sampling and active air sampling for Cleanroom Suite 114, as required by MICRO-SOP-2 (Environmental Monitoring of the Clean Room Facility), during the period of 03Aug2026 through 14Aug2026. Consequently, weekly EM data for Cleanroom Suite 114 were unavailable for two consecutive weeks.</p> <p>Risk Assessment: Five (5) Celsius sterility OOS investigations (OOS-261824, OOS-261861, OOS-261877, OOS-261878, OOS-261932) were identified during this period. However, the majority of sterility test batches processed concurrently in Suite 114 passed all acceptance criteria, and no widespread positive trend was observed. Session-specific ISO 5 BSC environmental monitoring, 24/7 Lighthouse HVAC/pressure logs, and method negative controls all remained within specification. Based on the absence of widespread positive results, the missed weekly background EM is determined to be unrelated to these isolated sterility failures. See attached Risk Assessment Addendum for full evaluation.</p> |                                        |
| CAUSE(S) ANALYSIS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                        |

| <p><b>Description of corrective action(s):</b></p> <p>The microbiology lab supervisor instructed the analysts to be more vigilant during the environmental monitoring process to ensure that the surface sampling of the anteroom and buffer room is performed as required. On 21-Aug-2026, Microbiology Laboratory Supervisor Robin Seymour instructed the microbiology team that an internal Weekly EM Sampling Tracking Sheet (EM Monitoring of Cleanrooms Rotation Schedule.xlsx) must be actively updated every week going forward to ensure rigorous tracking, accountability, and verification of all cleanroom sampling points. Analyst SMO will need to complete Read &amp; Understood retraining on MICRO-SOP-2.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                        |
